

PRO STAND

PIPELINE STAND / SKID SYSTEMS

PROSTAND

PIPELINE STAND / SKID SYSTEMS

The ProStand pipe stand is a light, strong, affordable and portable pipe stand designed to hold pipe of various sizes with a capacity of up to 2,500 lbs.

The ProStand can retain pipe ranging from one 1" to 12" in diameter. The patented ProStand is designed with two separate recessed cradles to accommodate different sizes of pipe. A smaller cradle can easily accommodate pipe ranging from 1" to 4" in diameter. Turn the ProStand ninety degrees and the large recess can accommodate pipe ranging from 6" to as large as 12" in diameter. These two cradle sizes in one unit will enable the ProStand to better retain the selected pipe size.

Molded out of high density polyethylene, each ProStand has been engineered to withstand loads of up to 2,500 lbs.

For more information on the ProStand pipe stand please contact:
